👤 Amira Abubakr

Profile

As Passionate Front-End Developer skilled in React.js, Next.js, JavaScript, Tailwind CSS, and Bootstrap. I thrive on creating responsive, high-performance user interfaces and visually stunning web applications. Dedicated to delivering exceptional user experiences and innovative solutions through collaboration and creativity.

Education

Zagazig University Computer And Information Science

2022-Current

Professional Experience

March 2024 – Present

Freelance Front-End Developer

- Worked on multiple responsive and dynamic web projects using React.js and modern UI frameworks.
- Built dashboards, landing pages, and small e-commerce apps.
- Integrated APIs and ensured cross-browser compatibility.

July 2024 – September 2024

ITI Front-End Development Internship

- Completed intensive hands-on training in front-end development.
- Worked on team-based projects using React, HTML/CSS, and REST APIs.
- Improved skills in responsive design and version control with Git

March 2023 – March 2024

Code Alpha – Front-End Developer Internship

- Gained practical experience in building and maintaining web interfaces.
- Focused on writing clean, maintainable code and implementing modern UI/UX practices.
- Participated in project planning and agile-style workflows

Technical Skills

Proficient in building modern, responsive web applications using HTML (Semantic, SEO, Multimedia), CSS (Responsive Design, Tailwind CSS, Bootstrap, MUI), and JavaScript (ES6, TypeScript). Skilled in using React.js, Redux Toolkit, React Query, and RTK Query for efficient state and data management. Experienced with Next.js for server-side rendering and performance optimization. Familiar with common Design Patterns and proficient in Version Control using Git and GitHub

Projects

Waffy Project [🔗](#)

2025

Technologies: React.js, TypeScript, Node.js, REST APIs

– A full-stack marketplace application enabling real-time product listings, buyer-seller messaging, and seamless checkout flows.

Plan B Platform [🔗](#)

2024

Technologies: React.js, TypeScript, Node.js, REST APIs, JWT

– A subscription-based system with dynamic user roles, plan creation, and JWT-based authentication and access control.

Real Estate Project [🔗](#)

2025

Technologies: React.js, Bootstrap, i18next

– A responsive real estate platform supporting unit search, filtering, and multilingual support to enhance property discovery.

Admin Dashboard [🔗](#)

2024

Technologies: React.js, Bootstrap, React Context

– An admin dashboard to manage members, publish news, and control content access across a political party's digital ecosystem

Portfolio [🔗](#)

2024

Technologies: React.js, TypeScript, Bootstrap
